English 1180

31 August 2017

### Purpose Statement

The purpose of English 1180 is to learn to use the three step model, explore expert opinions, and compare them to your own thus forming the “we say.”

### Problem Statement

Why does it seem so impossible that a student of a lower social class can strive and get a higher education if they set their mind to it? Why do high schools create these bad habits if they want us to succeed? Why is it fair that wealth determines the quality of education a student gets? Why are they treating our youth's education like something they can bargain? Why do the teachers morally oblige? Do they know that they're holding kids back? Do students realize they're being taught according to social class?
